A thick yellow diagonal stripe runs from the top right corner towards the bottom left, separating the white background on the left from a solid yellow background on the right.

3.

PYTHON

PYTHON CHARACTERISTICS

- ▶ Created in 1991
- ▶ Heightened popularity around 2004, partially due to Google
- ▶ Designed for ease of writing code and readability (e.g., semantic indenting)
- ▶ Great all-purpose programming tool

4.

R

R CHARACTERISTICS

- ▶ Created in 1993; based on S (1976)
- ▶ Heightened popularity in the mid-2000s
- ▶ Many statistical processes that are extremely difficult in other languages are straightforward in R
- ▶ Favorite language of pirates

A thick yellow diagonal stripe runs from the top right corner towards the bottom left, separating the white background from a solid yellow area on the right.

5.

JAVASCRIPT

JAVASCRIPT

CHARACTERISTICS

- ▶ Created in 1995
- ▶ Popular almost immediately, as it was the main way to make webpages dynamic on the client side
- ▶ Based on Scheme, but has a syntax similar to Java and C++
- ▶ Because it was often run in unknown environments, known for platform compatibility issues
- ▶ Turned into a server-side language at the advent of nodejs in 2009

A thick yellow diagonal stripe runs from the top right corner towards the bottom left, separating the white background on the left from the solid yellow background on the right.

6.

JAVA

JAVA CHARACTERISTICS

- ▶ Created in 1995
- ▶ Based on C++
- ▶ Designed to create cross-platform applications (e.g., Windows, Mac, Unix)
- ▶ Popular almost immediately
- ▶ Open source since 2006

A thick yellow diagonal stripe runs from the top right corner towards the bottom left, separating the white background from a solid yellow area on the right.

7.

BASH

BASH CHARACTERISTICS

- ▶ Created in 1989; ancestors include:
 - Bourne shell (1979)
 - Thompson shell (1975)
 - Multics (1965)
- ▶ Included with Linux, OS X, and even Windows
- ▶ Designed to execute commands interactively; not originally for scripting
- ▶ Is generally available but not a good idea for anything other than simple scripts

A thick yellow diagonal stripe runs from the top right corner towards the bottom left, separating the white background from a solid yellow background.

8.

SQL

SQL CHARACTERISTICS

- ▶ Created in the mid-1970s
- ▶ Became popular in the 1980s and is the most widely used database language
- ▶ Can be used procedurally, but often is written in single statements and used with other languages
- ▶ Different implementations are not fully compatible with each other

A thick yellow diagonal stripe runs from the top right corner towards the bottom left, separating the white background from a solid yellow area on the right.

9.

CODA

FUTURE WORK

- ▶ Scheme
- ▶ Scratch
- ▶ Obfuscated Perl
- ▶ Piet
- ▶ Brainfsck
- ▶ Visual Basic

THANKS!
